FREEDOM OF CHOICE
GROHE SPA FINISHES

ESSENCE COLLECTION

FREEDOM OF CHOICE

DISCOVER YOUR PERSONAL STYLE

Inspired by worldwide colour trends emerging at international design shows, GROHE now offers 5 colour finishes, presented for the first time in the complete Essence line. And as always, everything at GROHE comes with a seal of exceptional quality. All our products' components, ease of operation and perfect looks have to withstand numerous endurance tests – the toughest in the industry. That's also true for our colours. Expect the same durability and quality over their lifetime as for our chrome products.

BRUSHED COOL SUNRISE

AN EXQUISITE STATEMENT

Make a statement with Brushed Cool Sunrise to bring a modern, yet vintage charm to life. Coordinate with dark, light or white interiors.

BRUSHED NICKEL

WARM & WORLDLY

The Brushed Nickel finish marries a minimalist aesthetic and cosmopolitan design to produce faucets that keep their finish the same as on day one.

HARD GRAPHITE

AN URBAN DYNAMIC STYLE

Contrast or camouflage: Hard Graphite is a perfect partner for elegant pairings with pure white or blending with tone-on-tone environments. It works well with mid-tone environments such as concrete or light wood.

POLISHED NICKEL

THE NATURAL,
HARMONIC STYLE

The natural feel. Use our Polished Nickel finish where high quality combines with organic elements to deliver clear-headed purity and natural warmth. Harmonizes with stone, light concrete or marble.

STARLIGHT CHROME

BRIGHT & PRECISE

The GROHE StarLight® Chrome finish casts your bathroom in a very special light and for a very, very long time.

GROHE PVD

UNRIVALED HARD AND SCRATCH RESISTANT

Made-to-last surfaces ranging from precious matte to shiny like a diamond.

GROHE faucets are made to look as beautiful decades on as they did the day you first fell in love with them. The special recipe to success lies in our long-lasting surface quality. GROHE uses state-of-the-art technology to deliver exceptional quality finishes. The physical vapor deposition (PVD) process ensures that the surface composition is three-times harder, delivering glistening gold or sophisticated stainless-steel finishes. As well as being harder, the surface is also ten times more scratch resistant, so it can be cherished for a lifetime.

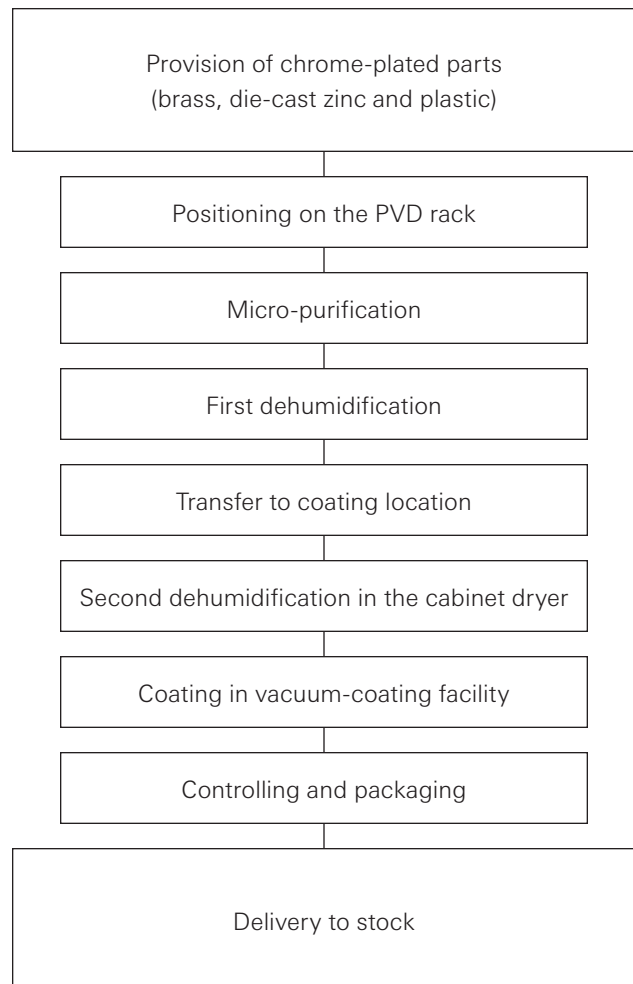

HOW DOES PVD WORK?

OUR HIGH-END PVD TECHNOLOGY BRINGS OUR NEW COLOURS TO LIFE

When it comes to a good design strategy, the choice of colours plays a vital part. But not only the colour, the quality of the finish is equally important. Especially in the world of bathroom and kitchen solutions and where surfaces ought to last for a long time, excellent, highly resistant finishes distinguish good products from great ones. GROHE's aspiration to always produce only the best drove us to choose a special technology that assures, not simply the best, most brilliant colours, but a durable coating of the highest quality.

Our aim: to offer our consumers long-lasting water enjoyment. Next to the resistance of the material, it was also about the look of the colour itself: we wanted to make brushed hard graphite as dark grey as possible and give our golden finishes the brilliance they deserve. That was the task for our technology team. In close collaboration with the GROHE design team, they achieved exceptional results working with a great new technology: PVD.

WHAT YOU GET WITH YEARS OF OUTSTANDING **GROHE QUALITY AND PAINSTAKING EFFORT**

This technology is divided in two major steps: Pretreatment and PVD coating.

The first step, pretreatment, refers to the thorough cleaning of the faucets. They are positioned on racks and hung in cleaning baskets. Now, the faucets undergo a special cleaning process, using acid & alkaline cleaning media. This is followed by thorough drying in a vacuum. After this procedure, the parts are micro purified and are removed from the cleaning line. They are then transported into the PVD coating area. Here, the air is conditioned to about 50 percent relative air humidity and to an ambient temperature of around 25°C. Here the racks are taken out of the cleaning baskets and loaded on dedicated PVD racks, which are then placed on a coating table. After this, the parts get heat treated in an oven. Here, plastic parts go through a degasification process. The retention time is at least three hours. Metal parts are heated up and require at least one hour. Now a product carrier transports the dried and heated components into the PVD machine.

The second step is the PVD coating. After the door of the PVD chamber has been locked, the program sequence starts and the target material gets evaporated. This coating process takes place in a high-vacuum environment and consists of three steps: first the substrate cleaning, then the primer coating and at last the colour coating. To realize different colours, reactive gasses like nitrogen and acetylene are added to the target material zirconium. The time required for a coating depends on the process and takes between one and two hours. After the coating, the table gets finally moved out of the PVD machine via the product carrier. In the last step, every product is carefully controlled for defects before they are packaged and delivered to stock.

WHY IS A PVD COATING **SUCH A VASTLY SUPERIOR FINISH?**

The new colours of our GROHE SPA Colour collection are produced with PVD technology. Now what makes GROHE's PVD technology so much better than common chrome plating? To begin with, all PVD coated colours are extremely uniform because of the absolute evenness of every layer.

Unlike normal electro-plated finishes with their very limited range of colours, our PVD finishes offer you flexibility and choice with the wide range of colour options. You can simply choose the one that suits your interior design strategy best.

With our PVD coated products, we not only created highly aesthetic colours, we also made these colours more durable than ever. The adhesion of the coating plays a vital role in ensuring a beautiful and long lasting finish. Our PVD process achieves six times greater adhesion. An ordinary electro-plated surface just can't compete. All our faucets are highly resistant to abrasion and resilient to hard knocks. This guarantees that our consumers will enjoy using these high quality faucets and mixers for years and years to come.

At GROHE we are not only passionate about bathrooms and kitchens, we also care about the environment. In order to be as environmentally friendly as possible, we use no harmful chemicals in our PVD technology.

A DISTINCTIVE AESTHETIC ONE SEAMLESS COLLECTION

The GROHE Essence collection is characterized by its incredible consistency, with each product coordinated perfectly in every single detail – both technically and visually. Drawing on the same gentle U-shaped spout shape for a clean, modern look, you'll find every element of the collection, from shower head to lavatory faucet, will effortlessly combine into a stylish, coherent whole.

MOMENTS OF TRUTH

Seven decades of research and development has resulted in a range of products that are renowned worldwide for their technical excellence and longevity. Throughout this price list you'll find references to our water technologies, all of them developed to make your experience with GROHE different, special and better.

GROHE SILKMOVE®

Smoothest handling for effortless precision and ultimate comfort for a lifetime.

GROHE STARLIGHT®

Made-to-last surfaces ranging from precious matte to shiny like a diamond.

GROHE DREAMSPRAY®

Innovative quality showers for luxurious revitalization and wellbeing.

GROHE ECOJOY™

Save precious resources and enjoy 100% water comfort.

GROHE TURBOSTAT®

Always the right temperature, for utmost convenience and safety.

GROHE QUICKFIX®

Faster, easier and hassle-free, GROHE QuickFix® cuts installation time by up to 40%.

AQUAGUIDE

Variable spout end for adjustment of water flow.

GROHE SMARTCONTROL®

Variable spout end for adjustment of water flow.

SAFESTOP

A safety button with manual override at 100°F (38°C)

SPEEDCLEAN®

Remove limescale with a single wipe.

PULL-OUT DUAL SPRAY

Increases operating radius of the faucet and offers easy switching between mousseur and the spray.

COMFORTHEIGHT

Height of the spout allows easy filling of large pots.

EASYDOCK

Guaranteed easy retraction and smooth docking for your pull-out spray head, every time.

PROFESSIONAL-SPRAY

Features a 360° spring arm and easy switching between the spray and mousseur.

EASYDOCK M

Integrated magnet for seamless docking of the spray head.

GROHFLEXX

With flexible, hygienic GrohFlexx kitchen silicone hose.

SWIVELSTOP

Limited turn angle prevents flooding.

FORWARD ROTATING LEVER

Forward rotating lever prevents the lever hitting the backsplash.
