Press the top button

MEDIUM SPARKLING

Press both buttons one after the other

FULL SPARKLING

Press the bottom button

UNFILTERED WATER

Lever handle with textured tip for a sure grip

Dual Hose Water Ways For 100% Purity And Taste

To ensure that GROHE Blue® water does not come into contact with unfiltered water or with metal parts after filtering, the high-quality fitting features two separate waterways – one for regular tap water and one for the purified GROHE Blue® drinking water. This prevents it from becoming tainted, preserving the great filtered taste.

UNIQUE 5-STEP FILTER TECHNOLOGY

The 5-stage filter with technology by BWT removes all unwanted substances that will affect taste and smell of the water. It eliminates chlorine, limescale, heavy metals and particles for a pure and fresh water taste.

THE INDIVIDUAL CHOICE OF FILTRATION FOR PERFECT TASTE

For our GROHE Blue® system we have worked with BWT, Europe's leading filtered water professionals, to ensure that our system produces an unparalleled, refreshing drinking experience. Our high-performance filters apply a 5-step filtration process to remove even the smallest particles from tap water, while leaving behind all the important minerals that benefit your health and provide pure taste.

ACTIVATED CARBON FILTER

- + TASTE
- CHLORINE

Activated Carbon Filter	
Product #	40 547 001
Capacity*	3000L (792.5 Gallons)

M-SIZE FILTER

- + TASTE
- HEAVY METALS
- CHLORINE
- LIMESCALE

5-Stage, M-Size Filter	
Product #	40 430 001
Capacity*	1500L (396.3 Gallons)
Height	14.19" (36.0 cm)

GOOD

ACTIVATED CARBON FILTER

If you live in a soft-water area, the activated carbon filter is right for you. It improves the taste but leaves the carbonate levels in the water untouched.

BETTER

S-, M- & L-SIZE, 5-STAGE FILTERS

The S-, M- & L-Size filters use a 5-step filtration process to remove even the slightest trace of impurities from the water, while retaining all the important minerals that benefit your health. The filter also fulfills another essential function: By filtering out limescale it ensures that the cooler can perform perfectly over its long lifetime.

BEST

MAGNESIUM+ FILTER

For the best taste and health benefits, the magnesium+ filter is the ideal choice. It adds up to 35 mg magnesium to each litre of water, helping you get enough of this essential mineral while delivering the best tasting water possible.

SUSTAINABLE SOLUTIONS

GROHE Blue® offers a smart alternative which cuts the waste involved in processing bottled water and reduces CO₂ emissions by an impressive 83%, according to a study by the University of Goettingen. GROHE Blue® also just needs the 1 litre you drink instead of 7 litres for bottled water, reducing waste by 85%. This makes the GROHE Blue® water system a sustainable alternative to bottled water.

To produce 1 litre of bottled water, 7 litres of water is needed

GROHE Blue® needs only one

CONVENIENCE ON TAP

Think for a moment about the energy and hassle it takes to keep a supply of bottled water on hand at home. You have to buy it from the supermarket, then lug it from the car to your house. Once there, you have to find space to store it out of sight. And when you've finished it, you have to return or recycle the plastic bottles, before starting the whole process again.

By installing a GROHE Blue® system in your kitchen, you can say goodbye to the hassle and inconvenience of bottled water with no compromises on taste or health. Just turn the tap and enjoy an unrivaled refreshment experience. What could be easier than that?

REDUCING WASTE, RESPECTING NATURE

Water needn't cost the earth

It takes an astonishing 7 litres (1.85 gallons) of water to produce a single quart (1 litre) of bottled mineral water. Not to mention the energy used, CO² emissions created and the 1.5 million tons of plastic packaging used by the industry each year.

At GROHE we are always working to secure the future of water, our most precious natural resource. This is the driving force behind the development of such products as GROHE Blue®, which help people manage their water and energy consumption with ease.
